

PRODUCTS COVERED	Patient Monitoring devices
TITLE	PRODUCT SERVICE SUPPORT STATUS UPDATE
SUBTITLE	END OF SERVICE INFORMATION
NUMBER	077-0522-00 Rev. J
DATE	29 August 2024

1 Purpose

Patient Monitoring devices and software **End of Service Support** and **End of Sales** information is listed.

2 Summary

This bulletin provides information on the “End of Service Support” dates for the Spacelabs Healthcare Patient Monitoring product range.

Revision History:

Rev H: added SafeNSound end of support and end of life for versions 5.2.x, 5.3.x, and 5.4.x

Rev G: added C50 to the list and is in service. Updated DM4 end of sales to April 30, 2024 and end of service to December 31, 2029. Added specific end of sale dates for SafeNSound Standard and Professional specific part numbers. Updated the SafeNSound Enterprise product part numbers. Placed each of the current ICS components on a separate row.

Rev F: added 90387 Ultraview 1700 with end of sales 30-May 2008, end of service 30 May 2015. Added 91390-B and 91390-C with end of sales 2017 and end of service 31 December 2024.

Rev E: adjusted the Datum vaporizers’ end of service date. For individual Datum part number details, refer to the list in the customer service note, 077-0414-00.

Rev D: updated list with the following Flexports that are in service: 90436A and 90442A. Updated the list with the out of service Flexports: 90442A-02, 90519B and 91443A.

Rev C: updated list with Rothman Index, DM4, Lifesync, 90499 2-bay housing module, and changes to 91439B Flexport Edwards, 90439 Flexport

Rev B: Added active Patient Monitoring devices and software.

Rev A: Initial release

Dear Valued Customer,

As someone who cares about providing high quality patient care, you know that keeping critical medical devices such as Spacelabs Healthcare Patient Monitoring hardware and software in good working order is important to your success. At Spacelabs, we understand this priority and strive every day to provide you with a combination of great products and outstanding service support. Our goal is to help you to manage your patient monitoring systems efficiently with maximum uptime and to help you plan for the future.
